(845) 760-9616 | humza.khaliq03@gmail.com | linkedin.com/in/humza-khaliq | github.com/Humza-khaliq | Boston, MA

TECHNICAL SKILLS

Languages: Python, Java, C#, TypeScript, JavaScript, Go, SQL, HTML/CSS
Frameworks: Angular, React, Next.js, Node.js, FastAPI, Flask, REST APIs, Supabase
Databases & Cloud: SQL Server, Postgres, ChromaDB, AWS, Docker
Testing & DevOps: Unit & Integration Testing, Playwright, CI/CD (Jenkins, GitHub Actions), Git, Linux/Unix
AI: LLM workflows, RAG pipelines, AI agents, AI coding assistants (Claude Code, Copilot)
Practices: OOP, Microservices, Agile/Scrum, Code Reviews, Test Automation, Quality Engineering

EXPERIENCE

- Software Quality Co-op** July 2026 – Present
Berkshire Grey Bedford, MA
- Designed and executed 50+ Python-based E2E and integration test suites with Playwright, expanding automated coverage by 22% across API and UI workflows.
 - Troubleshoot complex edge cases across REST API and system-level tests, driving root cause analyses that cut recurring failures by 25%.
 - Automated test execution across 10+ CI/CD pipeline stages with n8n and Jenkins, reducing manual QA effort by 35%.
 - Collaborated with developers in Agile/Scrum sprints and code reviews to prioritize and resolve high-risk defects.
- Full Stack Engineer** April 2026 – June 2026
Elevate The Game Remote
- Built a full-stack client portal in Next.js, TypeScript, and Supabase (Postgres) with role-based access control and REST API integrations, onboarding 15+ partners.
 - Wrote 50+ unit and integration tests across client and admin workflows, reducing pre-launch defects by 20%.
- Founder & Developer** Oct. 2025 – Present
The Cutfish Amherst, MA
- Built a full-stack booking platform with Flask and RESTful APIs scheduling and generating 20+ appointments in 2 weeks.
 - Designed a responsive booking flow with automated test coverage to catch conflicts early, cutting scheduling errors by 30%.

PROJECTS

- Beats by Dre – EDA & Sentiment Analysis** | *Python, Matplotlib, Seaborn, Google Colab*
- Synthesized 150+ survey responses into an AI-enhanced sentiment dashboard, uncovering 5+ actionable consumer trends and quantifying sentiment shifts across 4 key themes to guide product messaging and feature prioritization.
 - Benchmarked competitive positioning by mapping competitor attributes across 5 product lines using sentiment analysis, producing 10+ insight-driven recommendations that improved decision accuracy for roadmap trade-offs within 2 weeks.
- Lume – Wildfire Detection System** | *Python, Flask, YOLOv8, Seaborn*
- Built a real-time fire and smoke detection system with Flask and YOLOv8 to flag hazards in live video streams.
 - Designed 30+ test cases to validate model performance, exposing detection gaps across edge cases.
 - Refined detection thresholds based on test results, improving accuracy by 15% and reducing false positives.
- Jarvis – Voice-Interactive AI Assistant** | *Python, Groq (Llama 3.3-70B), ChromaDB, faster-whisper, ElevenLabs*
- Built a voice-interactive AI agent powered by Groq's Llama 3.3-70B, orchestrating tool calls for calendar and search tasks.
 - Implemented ChromaDB-backed retrieval to give the assistant persistent, context-aware memory across conversations.
 - Integrated faster-whisper speech recognition, ElevenLabs voice synthesis, and openWakeWord for hands-free interaction.

EDUCATION

University of Massachusetts Amherst Amherst, MA
BS in Data Science, BBA in Operations & Information Management - Dean's List, Chancellors Scholarship May 2026

LEADERSHIP & INVOLVEMENT

- National Swimmer** May 2017 – 2020
Pakistan Swimming Federation
- Represented Pakistan at the 7th FINA World Junior Championships in Budapest; school team captain with 100+ gold medals in national competitions.
- UMass Amherst Student Organizations**
- Treasurer, Cricket Club; Team Leader, MassAI; Member of Entrepreneurship Club, Pakistani Student Organization.
